

Syndicate Has Bought Mine For 150,000\$.

What constitutes the largest mining deal made in the Patagonia mining district for some time was the sale of the Mammoth group of claims to an English syndicate headed by Clement Guion II, by R. R. Richardson. The deal for the purchase of the property has been pending for some time and is said to have amounted to about 150,000\$.

The Mammoth group of claims, 14 in number, are said to be one of the best prospects in the district. Several attempts to purchase them were on in the last year but none were closed.

The claims are a copper-silver proposition and while very little work has been done on the claims, Mr. Guion will at once go to New York to consult with the members of his syndicate regarding their future plans, and will return in a very short time to start a force of men on the development work.

The claims adjoin the famous Moctezuma mine owned by the McCormicks and it is believed that the vein of the Mammoth is simply an extension of the Moctezuma vein, and the ore now taken from the Mammoth is comparatively the same as that taken from Moctezuma.—Tucson Citizen.

Parallel Ore Ledge is Cut.

Word received by wire today from Rochester is to the effect that the vein cut in the Wingfield tunnel on the Weaver group of claims is 2 feet 5 inches in thickness. Outside of picked specimens, according to the message received by Mr. Wingfield, the ore looks very poor and it is not thought that the main vein has been struck. The main vein is believed to be about 20 feet further, and the first vein struck is apparently a parallel vein. Assays have not yet been reported upon.

The Big Four tunnel, it is said, was started on ground of the Weaver group, and the first strike reported from that property is said not to be over the line into the Big Four lease. One report is to the effect that the ore is apparently hardly of shipping grade. Another is that it runs 200\$, mostly in silver. A conservative estimate of 75\$ a ton is made in another quarter.

Today the excitement in Rochester is said to be on the increase again owing to the finding of ore at depth yesterday. A report has been received that the ledge has opened up to seven feet.

Both the hanging and foot wall are now defined in the Nenzel tunnel, showing an ore body of five feet.—Reno Gazette.

Laswell Strikes Gold in Burros.

A Silver City, N. M., dispatch says: Ben Laswell, an experienced miner and owner of a group of copper claims in the Burro mountains, is just in from his claims, where he has been doing assessment work. In sinking a hole, he struck gold and the samples he brought in indicate the strike is a rich one, and further investigation, he believes, will show that it is very valuable. Shafts on his copper claims are down several feet into sulphide copper ore.

The opal company, operating near Bayard station, has completed its assessment work and is now sinking a shaft and, as depth increases, the opal improves. It has struck the black opal, the first, so far as known here, ever discovered in America. The mine promises to be an important addition to the mining industry of Grant county. Its owners are Maj. Waddill and son, of Deming; Archibald Davis and Charles B. Spence, of Silver City. They have moved the camp to a more favorable location and greatly improved it.

The Phelps-Dodge people are pushing work on the big tunnel at Tyrone and Leopold and working a big force at three different points. A great part of the tunnel will be some 300 or 400 feet under the surface of the ground. It is the biggest piece of mining work undertaken in Grant county.
